PREZISS

## K\_MILL system by PREZISS

Preziss presents the system of tools for edge trimming and high performance rebating, assembling polycrystalline diamond (PCD) interchangeable blades.

The K\_MILL edge trimming cutter of PREZISS uses interchangeable blades that offers a great versatility of use and in turn are very simple to use as the system is designed to facilitate rapid and completely autonomously change by the customer. The easy thing does not mean it's easy, just easier to use.

**High performance**

**Versatility**

**Easy to use**

### Application K\_MILL

- Suitable for routing chipboard and MDF covered with melamine, paper, veneer, etc...in profiling machines, edge lipping, etc. Para trabajar a favor o en contra del avance.
- Standard and Concrete solutions on demand.

- Aluminium body
- Lightweight
- Less noise
- lower consumption

- PCD inserts
- High performance
- Easy to change

- standardized Parts
- great stability
- reliability
